Deze schilderwerken zijn een vervolg, een vierde versie van Artfull Intelligence. De werken zijn gemaakt door een AI afbeeldingen te laten creëren, deze afbeeldingen werden afgedrukt op dik papier en op sterke planken gekleefd. Vervolgens werden er kapotte stukken technologie aan toegevoegd om vervolgens de werken te beschilderen. Zo werden deze schilderwerken gemaakt.

These paintings are a series, a fourth version of Artfull Intelligence. The works were created by letting an AI create images, which were printed on thick paper and glued to sturdy boards. Broken pieces of technology were then added, then the works were painted. That's how these paintings were created.
